[LinkedIn](#) | [GitHub](#) | [LeetCode](#)

SKILLS

Languages: C++, Java, JavaScript, Python

Technologies: React.js, Node.js, Express.js, Spring Boot

Databases: MongoDB, MySQL, Postgres, Redis

Core CS: Data Structures & Algorithms, Object-Oriented Design, Operating Systems, Database Management Systems, Computer Networks, Complexity Analysis

DevOps & Cloud: Docker, Kubernetes, CI/CD Pipelines, AWS, GCP

Tools: Git, REST APIs

EXPERIENCE

Backend Developer — Administrative World

Jun 2024 – Jul 2025

- Developed backend services for an EdTech and Learning Management System (LMS) using Node.js and Express.js
- Designed and implemented RESTful APIs for course management, user authentication, and live class integration
- Integrated third-party APIs to support real-time live classes and external service communication
- Built a scalable backend system supporting 5000+ registered paid users with efficient request handling
- Optimized database queries and backend workflows to improve system performance and reduce response time

Web Developer Intern — Desi Dude Innovation Pvt Ltd

May 2023 – Oct 2023

- Developed and maintained web applications using WordPress and PHP
- Gained hands-on experience with MERN stack for building dynamic web applications
- Built responsive user interfaces using HTML, CSS, and JavaScript
- Contributed to the development of an e-commerce platform (Boot Wala)

PROJECTS

StudyNotion | MERN Stack Learning Management System

- Engineered a full-stack LMS platform supporting authentication, course management, and secure transactions
- Designed RESTful APIs enabling efficient client-server communication
- Developed scalable backend architecture using Node.js and MongoDB to handle multiple users

Airbnb Backend System | Java, Spring Boot

- Developed backend services for a hotel booking and laundry management system using Spring Boot
- Designed RESTful APIs for booking workflows, user management, and service handling
- Designed system to handle high-frequency user interactions efficiently
- Implemented modular backend architecture to support scalability and maintainability

LinkedIn Backend Clone | Java, Spring Boot

- Built a backend system replicating core LinkedIn functionalities such as user profiles, connections, and feed handling
- Designed RESTful APIs for user interactions, authentication, and content management
- Structured backend services to simulate real-world social networking system design
- Designed backend to simulate scalable social networking features including feed generation and user interactions

EDUCATION

Maulana Azad National Institute of Technology (MANIT), Bhopal | Master of Computer Applications

2025-2028

Maharaja Ganga Singh University, Bikaner | Bachelor of Computer Applications | percentage: 72.5%

2022-2025

ACHIEVEMENTS

- Solved 250+ Data Structures and Algorithms problems on LeetCode
- Strong foundation in problem-solving, including Binary Search, Sliding Window, and Graph algorithms
- Continuously learning system design and scalable application development
